TARJIN RAHMAN

PRODUCT & PROGRAM LEADERSHIP | DATA & ANALYTICS | HUMAN-CENTRED TECHNOLOGY

Halifax, Nova Scotia • 902-478-8753 • tarjin@gmail.com • Canadian citizen • Remote Canada
LinkedIn • Professional portfolio • Data Sculptor

LEADERSHIP PROFILE

Product, research and analytics leader with 20+ years turning user needs, complex data and technical constraints into shipped software and defensible decisions. Helped launch ACDSee Pro for Mac v1 and v2, coordinated outsourced development and QA teams, and collaborated across design, technical writing and customer communities. Co-developed team-specific Scrum/Agile practices and led the ACDSee Pro 3 Windows GUI modernization. Designed touchscreen paramedic ePCR and Siren Web workflows; brings eight years of analytics and current AI-assisted product engineering with accountable human judgment.

SELECTED LEADERSHIP & DELIVERY EVIDENCE

- **Product launches and modernization:** Launched ACDSee Pro for Mac v1 and v2; led GUI modernization for ACDSee Pro 3 for Windows, informed by user research and prototyping.
- **Distributed product leadership:** Co-developed Scrum/Agile practices with the Mac project manager and QA manager; coordinated outsourced development and QA teams in Ukraine across both Mac releases.
- **Cross-functional beta and customer relationships:** Worked with designers, technical writers and community managers who ran the public forum and were important partners for the 10,000+ participant beta and customer engagement.
- **Analytics and regulated workflows:** Reconciled justice data; designed Windows Toughbook touchscreen ePCR and Siren Web administration workflows, aligning requirements with NEMSIS v3.
- **AI-assisted engineering with human accountability:** Specified 400+ Rust/WebAssembly requirements for Data Sculptor and use adversarial QA, traceability and verifiable delivery checkpoints.

CORE CAPABILITIES

Product strategy, launches and roadmaps • Distributed product leadership • Cross-functional design, technical writing and community collaboration • Scrum/Agile practices • Public beta and customer feedback • Requirements and acceptance criteria • UX research and GUI modernization • Data quality and validation • Mobile touchscreen ePCR & browser administration • AI-assisted delivery with human verification • SQL, Oracle, Tableau and Excel

PROFESSIONAL EXPERIENCE

Founder & Product Lead | Red5Sorcery Books & Media Feb 2025–Present

- Lead product discovery, workflow design, priorities, backlog and release planning for Data Sculptor, a local-first data workbench built for explainable, verifiable data preparation.
- Specified 400+ testable requirements for the Rust/WebAssembly workstream; apply adversarial review, traceability, verification evidence and incremental delivery checkpoints.
- Coordinate specialized AI collaborators for research synthesis, requirements, prototyping and QA while retaining independent professional judgment and final acceptance.
- Conceived and shipped an offline privacy application, CloakYourSecrets.com, including testing, documentation and release.

Research & Statistics Officer | Nova Scotia Department of Justice Jun 2018–Oct 2026

- Translated operational questions into decision-support analysis using large Oracle-based data sources; documented definitions, data quality, assumptions and limitations.
- Reconciled national crime statistics with provincial justice-system data, tracing discrepancies and explaining analytical findings to non-technical stakeholders.
- Produced executive and public-facing reports, maintained 20+ open datasets and responded to privacy-sensitive requests for information.

Product Analyst | Medusa Medical Technologies Nov 2013–Jun 2017

- Designed **Siren ePCR Field User** workflows for paramedics using touch-enabled Windows Panasonic Toughbooks during mobile patient care; translated field needs into product and interaction requirements.
- Designed **Siren Web Administration**, a browser-based back end for related ePCR data and administrative workflows; led Siren v4 requirements through release and NEMSIS v3.4.0 certification with domain experts and engineering.

Product Manager | Radialpoint SafeCare Jan–May 2013

- Helped establish Scrum roles, backlog planning, requirements routines and cross-functional delivery practices for a new product team.

Product Manager / Product Owner | ACD Systems International Apr 2008–Sep 2012

- Launched ACDSee Pro for Mac v1 and v2; owned Mac product workflows, including metadata-based Quick Search and EXIF/IPTC search and organization.
- Led GUI modernization for ACDSee Pro 3 for Windows; advanced a modal, workflow-based redesign through prototyping, usability research and presentations.
- **Distributed delivery:** With the Mac project manager and QA manager, developed and implemented team-specific Scrum/Agile practices; coordinated outsourced remote development and QA teams in Ukraine for both Mac releases.
- **Cross-functional collaboration:** Worked extensively with designers, technical writers and community managers; the community team operated the public forum and helped sustain the 10,000+ participant beta and customer relationships. Used feedback to inform fixes and release readiness.

User Research Analyst / Specialist | Adobe Systems Feb 2005–Mar 2008

- Translated usability studies of Acrobat/Reader 8 and early Acrobat 9 into actionable product recommendations; coordinated external research and communicated results to product teams.
- Prototyped and tested an Adobe–Google Toolbar concept to inform a time-sensitive product partnership decision.

Design Researcher / Usability Engineer | Microsoft Oct 2001–Jan 2005

- Researched Office Visio 2003 and SharePoint Portal Server Search, My Sites and List Management; translated findings into product and workflow recommendations.

EDUCATION & CERTIFICATION

MLIS — McGill University • MA, Human Development & Applied Psychology (HCI / applied cognitive science) — University of Toronto • BSc (Honours), Psychology; Mathematics minor — Dalhousie University • Professional Scrum Master I (PSM I), Scrum.org, 2017

RESEARCH METHODS & TOOLS

Stakeholder/customer interviews • Usability testing • Surveys • Experimental design • Prototyping • SQL • Oracle and relational databases • Tableau • Excel / Power Query • Jira • Confluence • Technical specifications • Rust/WebAssembly product development. Peer-reviewed research published in Human Factors (1999), Information Processing & Management (2002), and JASIST (2002).

RED LINE

After more than 20 years in research, product development and analytics, I bring clear professional expectations to the work and the people affected by it.

- Dignity — Treat users, colleagues and customers as people, not metrics.
- Integrity — Represent evidence, limitations and outcomes truthfully.
- Rigor — Test assumptions and document what supports decisions.
- Professional Judgment — Use AI as an aid, never a substitute for accountable human decisions.
- Accountability — Own decisions, quality, and the consequences of delivery.
